HIGH PERFORMANCE STORAGE SOLUTION

PRESENTATION 2017

Vladimir Morozov
Partner Manager, RAIDIX

GEOGRAPHY

The RAIDIX Global Partner Network encompasses system integrators, storage vendors and IT solution providers from 30+ countries.

Cooperation with leading industry players, and global strategic partnerships to boost R&D and deliver joined added-value solutions to the market.

ABOUT THE COMPANY

Established in 2009 by a team of data storage experts and prominent mathematicians

10+ technology patents, proprietary erasure coding algorithms and RAID models

In-house Research Lab extending the company's technology horizons

Insights into smart algorithms, data mining, software-defined memory, machine learning

Cooperation with leading universities and mathematical minds across the globe

RAIDIX

ABOUT THE PRODUCT

RAIDIX is cutting-edge management software allowing to build professional data storage systems using commodity-of-the-shelf equipment.

At the core of RAIDIX, one can find the results of in-house mathematical and technical research.

The RAIDIX software is developed for industries where high storage performance, reliability and availability are key to business-critical processes and integrity of the IT infrastructure.

RAIDIX

ABOUT THE PRODUCT

Benefits

- Highest Performance
- Reliability and Fault-tolerance
- Cost-effectiveness
- Flexibility and Functionality
- Easy Scale-Out

Industries

RAIDIX offers tailored solutions to Enterprise, Media & Entertainment, Video Surveillance, High-Performance Computing (HPC) and other data-rich industries.
